Lunch and Learn Seminar at Mijares Mexican Restaurant Pasadena

Remote Monitoring and Pro-Active Support for Your Information Technology

For many companies, an hour of downtime can cost thousands of dollars in lost productivity. The success of your business depends upon application availability and the solutions that provide immediate recoverability. Network outages can happen unexpectedly and often at the most inconvenient time; with constant systems monitoring and pro-active network management many problems can be avoided. For those that can't, rapid response from local engineers can have you back up and running with minimal loss of productivity.

This seminar is ideal for business owners and leaders who have an existing network with at least one server and can answer Yes to any of these questions...

- Would you like to **save on IT costs**?
- Do you feel your **network could be more reliable**?
- Is your network **vendor not as responsive** to your network issues as your business needs dictate?
- Do you have **internal personnel supporting systems who are not trained IT professionals** and their IT efforts are taking them away from their main daily responsibilities?
- Is the cost of a **full-time IT staffer not justified**?
- Is there **not enough time in the day** to take care of all systems with current staffing?
- Would you like to **take the worry out of technology** management?

You will learn how our GenCare active monitoring and support program will enable your organization to reduce costs and improve your systems availability – while off-loading distractions of IT so you can concentrate on your business.

Find out how we can provide:

- **Monitoring of key systems indicators and alerts** – we have advanced warning of potential problems and immediate alerts of failures, without needing you to call us
- **On-Site and remote response** – qualified and experienced engineers are local to your office
- **Regular reporting of system performance** – systems metrics reports facilitate future planning
- **Consolidated tracking of warranties, maintenance contracts and license agreements** – we let you know in advance and keep all your vendor agreements up to date
- **Free advice on system upgrades and expansions** - technical advice and planning on virtualization, disaster recovery and cloud-based solutions, to name a few 'hot' topics

Please join us as we host this educational seminar at Mijares, Pasadena's oldest and finest Mexican restaurant and a happy GenCare client. Discover how we can economically take on your IT support to make your environment highly available and cost-effective.

This seminar is free of charge and designed for local business owners and leaders. Please feel free to pass this invitation to others in your organization as appropriate. We regret that we cannot accommodate other IT vendors or consultants at this event. For more information please contact [Sara Aziz](#) at 818-249-1962 ext 710.
